The rigorous training with over 50% of time spent on projects provide more than one year of practical field experience in chosen domains. Apart from providing accelerated learning platform for real life skills we provide an ecosystem for developing and building innovative application(products and services) and applicable to various sectors such as Cloud computing, Bigdata, WSN, Datamining, Network Security & Android based application.

KEY FEATURES

1. To bridge the gap between industry and academia.
2. A full fledged training and R&D facility.
3. Students can interact with industry experts for guidance and mentorship.
4. It facilitates to work on various domains like Networking, Bigdata, Cyber Security, Datamining/ Webmining, Cloud Computing, Mobile Computing, Wireless Network, Wireless sensor Network
5. Work on real time projects to get hands on experience before graduation this will help the students to get the competitive edge for various jobs in the industry. We help to match between the job requirements of the industry and the capability of the candidate.
6. To bridge the gap between industry and academia.

Marketable candidates with Resume Building, Mock Interviews, Soft Skills Training, Free Online Employability Test

Current Trends:

- ❖ Java Tools
- ❖ Java IDE's
- ❖ Java Frame works
- ❖ Cloud Computing,Bigdata,(Haddop)
- ❖ Cyber Security, Datamining / Webmining
